1. [Additional Tokens Support on Message Template.](#)
2. [Support Tags on Users.](#)
3. [Calls Distribution.](#)

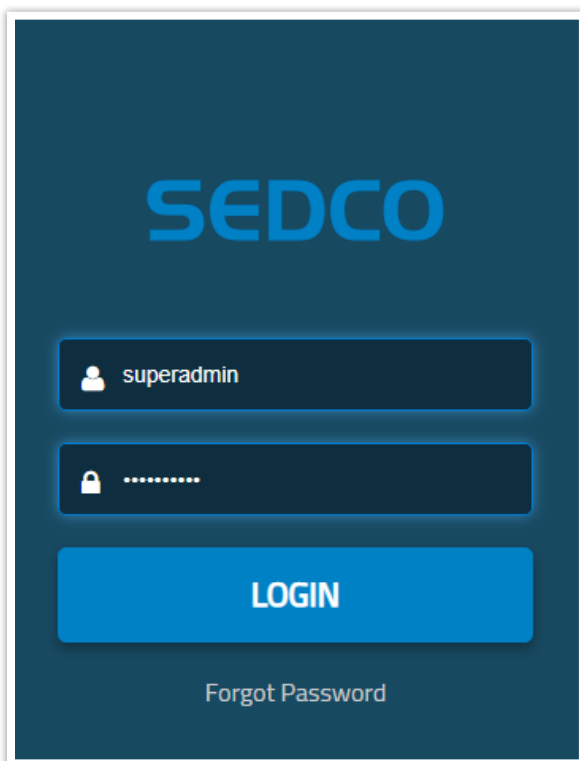

OVERVIEW

Self-service kiosks offer a flexible and convenient way to extend your business offerings and reach customers beyond the constraints of traditional office hours and locations. By providing access to your services 24/7, you can enhance the customer experience and increase customer satisfaction.

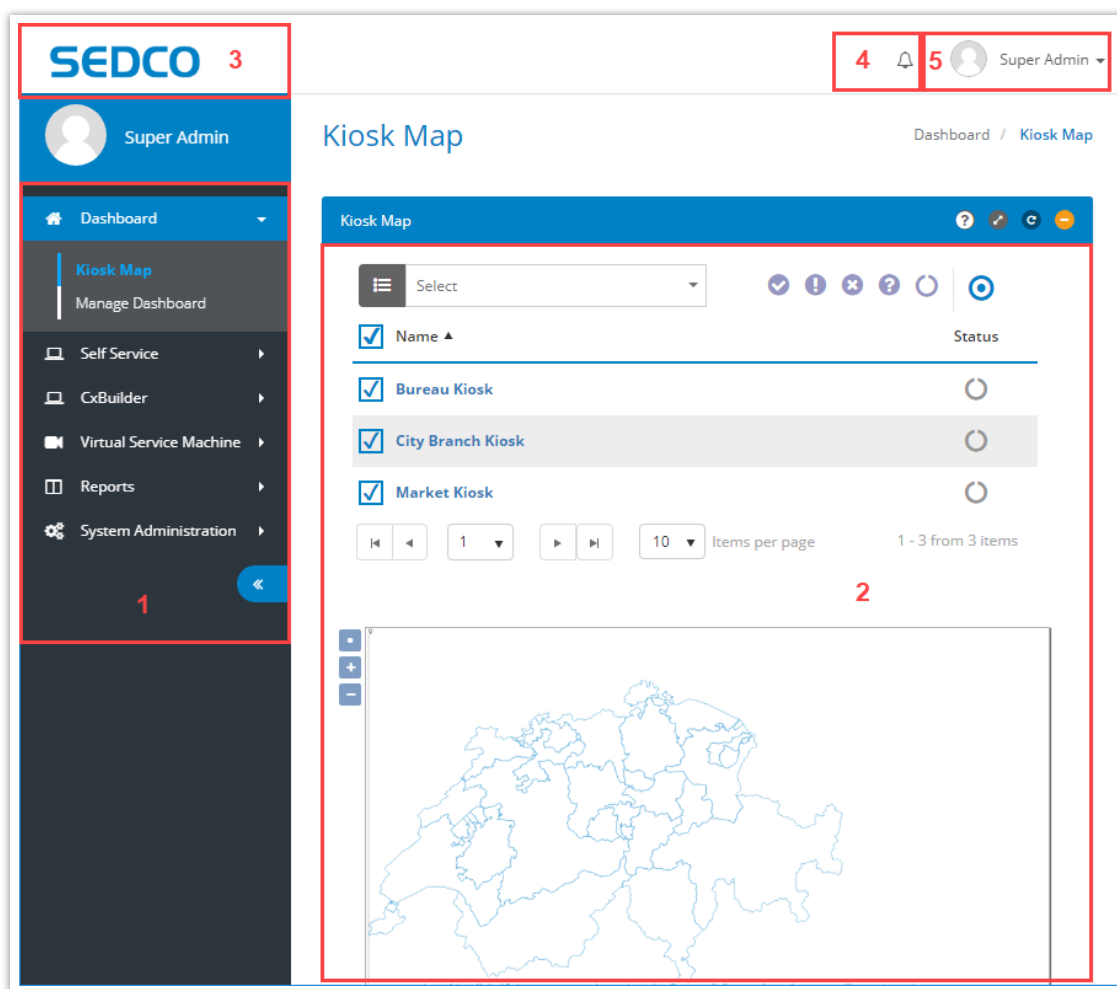

This manual serves as a comprehensive guide, walking you through every administrative step of the core module of the CEM Portal, which includes dashboards, reports, and system administration. With this guide, you'll be able to streamline your operations and optimize the performance of your self-service kiosks, ensuring that your customers have a smooth and efficient experience every time.

Getting to Know the CEM Portal

To begin using the Customer Experience Management (CEM) Portal, log in by entering your username and password, as the below screen shows. The default username and password for the first-time login is **superadmin**.

After you log in, the system will ask you to reset your password. Enter your current and new password, confirm it, then click **Reset**. The password should be at least ten characters long and include one capital letter and a unique character.

No.	Name	Function
1	Navigation Menu	This is the navigation part of the system, and you can access all of the functions and features from the sub-menus here. Each dropdown list contains several functions and features essential in the administration and configuration of the Self-Service System.
2	The Main Display Area	This is the working area where the contents of the selected menu option are displayed.
3	SEDCO The Home Page Button	Clicking on SEDCO will take you back to the Home Page.
4	Notifications 	Clicking on  will display a list of the notifications (popup alerts). When you have new notifications, several new (unread) notifications will appear in the red bubble beside the icon. You can read them one by one, or you can mark them all as read.
5	Account Settings	You can edit your profile, change your password, clear the server cache, or log out using this dropdown menu.
